Getting and Cleaning Data Course Project Codebook

This codebook has information of the data that is captured in the finaloutput.txt after running the run_analysis.R on the UCI HAR Dataset.

The final output has the information listed in the table below. Unit of measure

	Column Names	DataType	Unit of Measure	Description
1	SubjectId	Character	Not Applicable	Id used to identity the subject in the experiment
2	Activity	Character	Not Applicable as they are codes	Activity the subject was performing when the data was recorded. Applicable values are "WALKING", "WALKING_UPSTAIRS","WALKING_DOWNSTAIRS", "SITTING", "STANDING", "LAYING"
3	variable	Character	Not Applicable	The name of the variable whose value is calculated in the value column
4	value	Numeric	Applicable but do not have all the knowledge to put all the information	The calculated value of the variable name in the variable column
